Verbal Description

Candelero fragment that looks like a bunch of consolidated sand & is really crude & gross & cruddy. 6 chambers are visible & it appears to be a honeycomb shape. Chambers & their connecting walls are burnt 3/4 of the way up. Bottom exterior is not altered by fire.

Exterior has two rather large holes which lead to the interior walls and are approximately 1.0 cm in diameter. Decoration on the exterior consists of groups of diagonal incised lines. one group is of 4 lines, the other two are of 3 lines.
